# Alternatives

## Worksheet

**Activity:**

Generating alternatives is critical for testing and improving your design concept. Re-read your original design concept, examine the function-interaction table and identify several key features of your system. Then, create at least three different alternatives for one aspect of the system.

Think of different technologies or different types of interaction with those technologies, and consider what might work better or push the limits of your design in interesting ways. Discuss the alternatives and consider how they affect your design concept.

| Design alternatives | | | | | |
|---|---|---|---|---|---|
| Group | | Project | | Date | |
| Alternative 1 | | | | | |
| Description | | | | | |
| Alternative 2 | | | | | |
| Description | | | | | |
| Alternative 3 | | | | | |
| Description | | | | | |
